

## Radio Explorer II

### MOBILE FM BAND COVERAGE AND MODULATION ANALYZER RDS/RBDS DECODER-READER WITH BUILT-IN GPS RECEIVER

The Radio Explorer II is a full-featured device designed to cater for all market requirements. This easy for use mobile tool evaluates the FM broadcast band congestion and stores all important radio broadcast parameters in a Log file. The built-in FTP system allows downloading and managing of the files through DEVA Device Manager Software. The fully DSP- based FM radio frontend tuner utilizes the latest technologies in the DSP processing of the FM signal.

The Dual DSP-based, compact and affordable Radio Explorer II is a product of highly valued performance. This device is the perfect solution for field surveys and on site monitoring of station complete signal. With just a click on the button, Radio Explorer turns into an excellent tool for analyzing of the signal strength and quality after repairs or set-up of new equipment. This cost-effective device can measure RF level, MPX deviation, Left & Right Audio levels, RF field strength, RDS and Pilot injection levels. All measurements are visualized on easy to read OLED Graphical display.

Designed for signal surveillance on the field where the listeners are, all that is needed is a vehicle and Radio Explorer II. There are two campaign modes:

- 1. Radio Explorer II can be set to measure automatically one or multiple preselected frequencies (Up to 50);
- 2. RDS PI / RBDS Call campaign up to 10 stations can be chosen. Radio Explorer II will automatically detect the used frequency. While the campaign is running, the chosen stations will be monitored; Radio Explorer II will automatically switch between the variable frequencies during movement just as the car radio of your listeners.

When the campaign is over, using the supplied free of charge Windows software the log files could be converted into KMZ format and visualized in Google Earth. Such functionality is irreplaceable when current information of the FM broadcast band congestion and coverage is needed. As an addition, the Log file can be also exported and saved as a transitional format for future analysis.

The band scan mode guarantees realtime live visualization of either the FM band or a particular predefined part of it with down to 10 kHz resolution. Radio Explorer II can be controlled through:

- The built-in Web server a standard web browser can be used to monitor its status or to make some adjustments. iOS and Android devices are also supported. The Main Screen of the WEB Interface shows all mandatory parameters represented as LED bar graph readings;
- 2. The supplied free of charge DEVA Device Manager Software the easy-to-use interface allows quick and easy connection to the device. The dedicated module ensures managing of all the device's logs and displays respectively all the events in a handy manner;
- 3. The very intuitive user interface with OLED screen, Front panel navigational and soft buttons ensures an easy usage of the device's build-in features.

Supporting both RDS/RBDS standards and measurement units, the Radio Explorer II is a suitable choice for broadcast engineers from all around the world. The device offers various bar-graphs, data plots, histograms, etc. therefore it will meet the expectations of the most demanding broadcasters.

#### **FEATURES**

- Fully DSP based FM radio frontend
- FM Band 65÷108 MHz Basic Spectrum Analyzer
- · Selectable IF bandwidth
- · Built-in Stereo decoder
- Stereo Presence Detection
- LEFT and RIGHT demodulated audio level meters
- RDS and RBDS decoder
- RDS/RBDS Stream BER meter
- Powerful Dual DSP-based core
- Built-in 50-channels GPS Receiver
- Front panel OLED Graphical Display
- Very Intuitive Application Interface
- SNMP for adjustments and control

- Dual antenna ports supporting up to 100 dBµV direct RF Antenna Input
- MPX, PILOT, RDS deviation meters and RF Field strength
- Full control and monitoring via LAN & USB connection
- Easy to use WEB Interface
- Maintenance via DEVA Device Manager Software
- Measurement results visualisation in Google Earth
- Accurate front-panel metering for local use
- Headphone output with front panel level control
- RF and RDS Measurements (real time & average)
- FM/RDS/RBDS Data Logger
- 3 General purpose outputs GPS Fix, Multipath, Low RF Level
- Built-in FTP Server for easy download of the Log files
- · Robust, custom made Metal Case for high RF immunity

# Radio Explorer II

### **SPECIFICATIONS**

	RF Input
Tuning Range	FM Band 65 to 108 MHz
Tuning Step	10, 20, 50, 100 kHz
Tuner Sensitivity	30 dBμV
Antenna Ports	Dual, 2 x BNC Connectors, 50Ω
Antenna Ports Isolation	> 40 dB
Internal Attenuator	0, 10, 20 and 30 dB
Dynamic range	100 dB

FM Demod		
IF Filter Bandwindth	15 Increments (25kHz - 157kHz, Auto)	
Frequency Response	±;0.1 dB, 10 Hz to 86 kHz	
MPX Power	±12 dBr, 20 sec. integration	
Dynamic range	90 dB	

Stereo Decoder		
Frequency Respo	nse (L&R)	±0.1 dB, 10 Hz to 15 kHz
SNR (Stereo)	60 dB, 50 μ	s de-emphasis
THD	0.15% @ 1	kHz,
	0.4% - 10H	z÷15kHz, 50 µs de-emphasis
Separation	50 dB, 50 H	Iz to 10 kHz, 50 μs de-emphasis
Crosstalk	52 dB	

FFT Spectrum Analysis (RF, Composite, Audio)		
Signal Sources	RF (IF), MPX, Left, Right	
FFT length	2048 points	
Dynamic range	90 dB	

Scope Analysis (RF, Composite, Audio)		
Signal Sources	RF (IF), MPX, Pilot, RDS, Main, Sub, L, R	
Record length	4096 points	
Dynamic range	90 dB	

	Measurement Storage	
Storage 2GB Build-in Memory Card		
Data format	Text, CSV	

	GPS Receiver
Number of channels	50
Antenna	Pre-amplified, 5m of cable, magnetic
Connector	SMA, rear panel

RDS Decoder		
Standards	European RDS CENELEC	
	United States RBDS NRSC	
Error Correction & Counting	Yes	
AF, CT	Yes	
PI, PTY, DI, MS, TA, TP	Yes	
PS, RT, RT+	Yes	
TMC, ODA	Yes	
Group Analyzer	Yes	
BER Analyzer	Yes	
Group Sequence Display	Yes	
RDS RAW Data Display	Yes	

Outputs		
Audio (L, R)	+6 dBu, $600\Omega$ balanced XLR Connector	
AES3 (L, R)	$5.0 \text{ Vp-p}, 110\Omega$ , balanced XLR Connector	
Alarms	Terminals on rear panel, optoisolated	
Headphone	6,3mm (1/4") Phone Jack	

Communication Interfaces	
USB	B-type Connector
Ethernet 10/100 Base-T	RJ45 Connector

Metering Accuracy		
RF Level	±1 dB, 0 to 100 dBµV	
MPX Power	±0.2 dBr, -12 to 12 dBr, 0.1 dBr resolution	
Total, Pos, Neg	±2 kHz, 10 to 100 kHz, 1 kHz resolution	
Pilot, RDS	±0.5 kHz, 1 to 12 kHz, 0.2 kHz resolution	
Audio	±1 dB, +10.0 to -55.0 dB, 0.1 dB resolution	

Operating conditions		
Temperature	-15°C to 55°C	
Humidity	< 95%, non-condensing	
Altitude	0 to 5000m above sea level	

Power Requirement		
Power Supply	12 DC (11-15V) / 2A max at 12V	
Connector	XLR (on rear panel)	

	Size and Weight
Dimensions (W;H;D)	210 x 76 x 215 mm
Shipping Weight	470 x 180 x 310 mm / 4.031 kg
